PROJECTS SUMMARY

Customer Description: US retail pharmacy and health and wellness company USA, Life Sciences & Healthcare

Application: Web built on Microsoft Dynamics 365, mobile iOS, mobile Android

Responsibilities:

LANGUAGES

Belarusian (Native)

Russian (Native)

English (C1)

Polish (A2)

- Led 3 streams building 4 healthcare products based on Microsoft Dynamics 365 solution (defect containment for ~10 production releases was 95-100%)
- Participated in the meetings (daily stand-ups, scrum of scrums, sprint plannings, sprint reviews, retrospectives, PI plannings)
- Performed requirements analysis based on the product specifics and participation in backlog grooming/refinement sessions
- Test cases creation, review, execution and update
- Functional, integration, GUI, API, regression testing
- Bug and test results reporting using JIRA dashboards
- On-boarded and mentored new team members
- Participated in demo sessions with the customer
- Performed PO role for the automation team

Customer Description: Netherlands-based company specializing in the manufacturing and retail of bedroom furniture

EU, Retail & Distribution

Application: Web

Responsibilities:

- Participated in Discovery phase as Testing Coordinator
- Collaborated closely with the team and the customer creating Discovery QA deliverables (high-level Test Strategy, Testing Pyramid, CI/CD Pipeline)

Customer Description: US company that operates and franchises 7 food service brands

USA, Retail & Distribution

Application: Web, mobile Web, mobile iOS, mobile Android

Responsibilities:

- Communicated with stakeholders and third-party vendors to clarify the scope, priorities and current process as Testing Coordinator
- Created QA knowledge base (on-boarding materials, test case and bug creation rules, how-tos, etc) and QA documentation

Customer Description: British luxury fashion house

UK, Retail & Distribution

Application: mobile iOS

Responsibilities:

- Prepared and executed UAT scope with the country specifics (for global launch in 16 countries)
- Manual functional testing of the native iOS application
- Participated in daily meetings, sprint plannings, sprint reviews and demos, backlog refinement, other meetings with the customer
- Created templates for Regression and Sprint reports that reflected information and metrics which added visibility to the testing and test results

Customer Description: National Irish airline

Ireland, Travel & Hospitality

Application: Web, mobile Web

Responsibilities:

- Coordinated QA teams in different project streams
- Participated in workshops with the customer in Dublin, Ireland
- Led one of the Delivery Transformation initiatives - migration from several JIRA projects to the single Master Repository of test cases and their rewriting using page-based approach (total scope to rework was ~4500 test cases). The results of this stream helped to start UI Automation on the project and increase automation coverage
- Estimated QA tasks and QA effort for the planned project activities
- Analyzed requirements for the complex integrated application
- Functional InSprint testing and regression planning
- Delivered comprehensive reports on testing activities
